Read the following passage and answer the questions below.

Democracy represents a ray of hope for nations seeking self-determination and freedom. It empowers citizens by placing the power of governance in their hands, typically through free and fair elections. However, it's important to recognize that democracy cannot be universally applied in a one-size-fits-all manner.

Every country has its own unique historical, cultural, and social context that influences how democracy functions within its borders. What may work effectively in one nation may require adaptation to suit the specific needs and circumstances of another.

For democracy to thrive, active citizen participation is essential. This means not only voting but also staying informed, engaging in public discourse, and actively contributing to the political process. Additionally, safeguarding civil liberties, such as freedom of speech and the rule of law, is fundamental. These liberties ensure that diverse voices can be heard and that individuals' rights are protected.

Moreover, the rule of law must prevail, ensuring that everyone, including government officials, is accountable under the law. Democracy is an ongoing commitment that necessitates continuous efforts to uphold its principles, prevent corruption, maintain free and fair elections, and preserve the integrity of democratic institutions.

In essence, democracy is more than just a form of government; it represents a commitment to specific values and principles. It relies on active citizen engagement, the protection of individual rights, and the dedication to the rule of law. Safeguarding these democratic principles is crucial for fostering justice and stability within a nation and for promoting peace and cooperation in the global community. Democracies that uphold these principles often contribute to a more peaceful and interconnected world.

SubQuestion No : 7

Q.7 According to the passage, why is democracy not a one-size-fits-all solution?

- Ans**
- 1. Because it empowers citizens through free and fair elections
 - 2. Because it relies on government officials being accountable
 - 3. Because it requires adaptation to a country's unique context
 - 4. Because it prioritizes the protection of individual rights
