Comprehension:

Refer to the below poem and answer the questions.

Far far from gusty waves these children's faces.
Like rootless weeds, the hair torn round their pallor:
The tall girl with her weighed-down head. The paper-
seeming boy, with rat's eyes. The stunted, unlucky heir.
Of twisted bones, reciting a father's gnarled disease,
His lesson, from his desk. At back of the dim class
One unnoted, sweet, and young. His eyes live in a dream,
Of squirrel's game, in tree room, other than this.

On sour cream walls, donations. Shakespeare's head,
Cloudless at dawn, civilized dome riding all cities.
Belled, flowery, Tyrolese valley. Open-handed map
Awarding the world its world. And yet, for these
Children, these windows, not this map, their world,
Where all their future's painted with a fog,
A narrow street sealed in with a lead sky.
Far far from rivers, capes, and stars of words.

Surely, Shakespeare is wicked, the map a bad example,
With ships and sun and love tempting them to steal—
For lives that slyly turn in their cramped holes.
From fog to endless night? On their slag heap, these children
Wear skins peeped through by bones and spectacles of steel.
With mended glass, like bottle bits on stones.
All of their time and space are foggy slum.
So blot their maps with slums as big as doom.

Unless, governor, inspector, visitor,
This map becomes their window and these windows
That shut upon their lives like catacombs,
Break O break open till they break the town.
And show the children to green fields and make their world.
Run azure on gold sands and let their tongues.
Run naked into books the white and green leaves open
History theirs whose language is the sun.

Comprehension:

Refer to the below passage and answer the questions.

In today's fast-paced and demanding world, rules and regulations are essential in both small and large environments. Without these institutions, life would be much more difficult, and people would do as they please without consequences.

Rules and regulations are present in every aspect of life. In educational institutions, students must follow a set of rules. In the workplace, employees and employers must comply with employment regulations. In social and family gatherings, there are unwritten rules of behaviour. Even in our homes, parents make house rules for their children.

These regulations ensure the smooth functioning of society. They prevent chaos from prevailing and ensure that everyone adheres to a set of expected behaviours. Rules guarantee fair treatment for workers and fair play on the playing fields. They also ensure that no person or group may take advantage of others and that everyone respects each other's rights and property. This creates harmonious living conditions and establishes a basis for discipline so that children can be guided and socialised. Although some rules may appear childish and ridiculous, such as the penalties imposed on littering and vandalism, they are justifiable. Such regulations address the actions of thoughtless and inconsiderate individuals who may negatively impact the peace-loving majority of the community. Without the existence of rules and laws, respect for human life may be lost. Criminals and gangs could take over society, and the strong may take advantage of the weak.

Therefore, even though we may find some rules difficult to accept, we must acknowledge their importance. Rules and regulations contribute to better living conditions, and without laws and legislation, freedom would not be possible.
