(D) $\bigcirc$ Mother-in-law

## Question No. 17

Marks: 1.00
Bookmark

In this question, a statement is given followed by two conclusions numbered i and ii . You have to assume everything in the statement to be true, then consider the two
conclusions together and decide which of them logically follows beyond a reasonable doubt from the information given in the statement.

Statement: "In our school, kids are allowed to drink only hot water during Winter', said a caretaker of a school.

## Conclusion:

i) Drinking hot water is good for the kids during Winter.
ii) The school doesn't have the facility to provide cold water.

Choose the appropriate one from the following options
(A) Only conclusion i follows
(B) Only conclusion ii follows
(C) Either i or ii follows
(D) Neither i nor ii follows
(E) Both i and ii follow
(A) $\bigcirc D$
(B) $\bigcirc \mathrm{E}$ (Chosen option)
(C) $\bigcirc \mathrm{A}$ (Correct Answer)
(D) $\bigcirc B$

## Case Study - 18 to 21

Directions: In the following questions, few statements are given and these statements are followed by two conclusions numbered $i$ and ii. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts.
Choose,
(A) Only (i) conclusion follows
(B) Only (ii) conclusion follows
(C) Neither (i) nor (ii) follows
(D) Both (i) and (ii) follow
(E) Either (i) or (ii) follows

(C) $\bigcirc$ Grandmother
(D) $\bigcirc$ Granddaughter

Case Study - 24 to 27
Directions: Read the given information carefully and answer the questions that follow.
Eight persons are sitting in two parallel rows containing four people each, in such a way that there is an equal distance between adjacent persons.
In row-1 A, B, C and D are seated and all of them are facing South.
In row -2 P, Q, R and S are seated and all of them are facing North.
Therefore, in the given seating arrangement, each member seated in a row faces another member of the other row.
i) $P$ sits third to the right of $R$ and faces $A$
ii) $D$ and $B$ are neighbours
iii) C doesn't face $R$
iv) $Q$ sit to the immediate right of $R$ and faces $D$

Who sits to second to the left of $P$ ?
(A)
$\bigcirc P$
(B) $\bigcirc$ None
(C) $\bigcirc \mathrm{S}$
(D) $\bigcirc \mathbf{Q}$ (Correct Answer) (Chosen option)

## Case Study - 10 to 14

## Directions - Read the short passage below and answer the questions that follow.

Senior virologist Dr Jacob John said Omicron carries every spike protein mutation that was present in Alpha, Beta, Gamma and Delta. "In addition, there are more mutation. Thus, immunity induced by vaccinations can be less effective as against delta. This can lead to a decline in immunity and we have to increase the immunogenicity of the vaccine to increase the level of the response against virus. It is important to give booster doses to increase the antibody level like other countries," he said. He added that Covaxin has a broader immune response. Covishield is expected to have a better spike protein. Doctors say that it is important to continue the same diagnostic procedure and preventive measures as more information on the nature of the virus and how it can affect an individual is emerging. "For now, it is significant to intensify the RT-PCR testing and based on information from other countries, it is not very high but it's highly transmissible," said Dr Sindhura Koganti, consultant pulmonologist, Fortis Hospital. Talking about the changes in diagnosis and management protocol for those affected, experts say there might not be a major change in the protocol. "The testing needs to be intensified. However, genomic sequencing is to be done for those testing positive and the management of the Omicron cases is likely to be the same. On the vaccination part, more data is required to test their immunogenicity against the variant," said public health expert Dr K Kolandaisamy. Experts say the mortality due to

Omicron in other countries is not as high as delta. With Christmas and New year approaching, it's important to restrict social gatherings to prevent community spread.
